

Appliance Market Applications

Standex Electronics has had a proven track records in the appliances market. Washers, coffee makers, dishwashers, fryers, refrigerators, ovens, microwaves, and more – we provide reliable high-quality components that help turn on/off products, measure fluid level, transfer power, detect position, and provide other smart sensing solutions throughout the “white goods” industry. Our custom and standard reed switch, relay, and sensors, as well as magnetics and fluid level sensing items are of great value to a wide array of appliances.
