

Renco's RL-7747 is an economical current sense solution for line frequency currents.

Features:

- UL Class B (130°C) or F (155°) insulation systems available.
- UL Recognized Instrument Transformer (XODW2.E146186) per IEEE C57.13.2 and CSA C60044-1:07 with 300V (Class B&F) or 600V (Class B) spacings per UL5085-1 and CSA C22.2 No. 66.1-06.
- Designed to work at 47 Hz to 400 Hz

Typical applications include:

- Gear/switch boards
- Load/overload sensing
- Power demand monitor
- Power failure
- Feedback control
- Detecting load drop or shutdown
