About us

Standex Electronics developed its Toolshop in 1996 because of a growing demand for high precision quality tooling for our reed based sensor products. For more than 20 years this service has been expanded to support our customers demand and requirements.

We offer a complete package providing, prototypes, planning, tool design, manufacture of single & multi-impression mould tools, progression press tools, pressure die-casting tools. Special purpose tooling, tool repairs & maintenance, jig & fixtures.

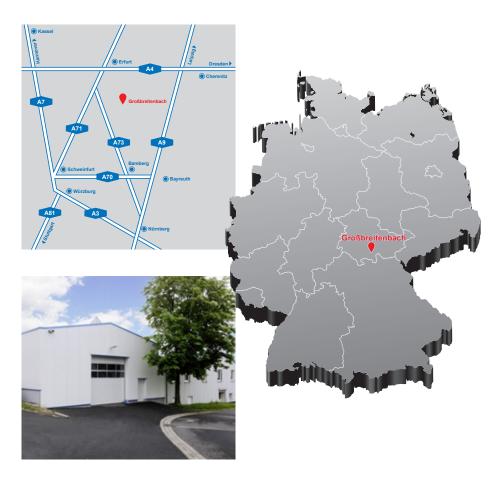

Our team of highly skilled and experienced employees will work with you providing a highquality reliable service to find the most cost-effective manufacturing solution for your needs.

Our continued investment in machine tools and computer technology allows us to offer the most advance techniques available using fully integrated CAD/CAM software, wire eroding, EDM machining, CNC milling, and a range conventional machine tools.

We operate from our purpose built 500 square meter premises based in Großbreitenbach Germany.

Machines and equipments

Sink EDM machine EXERON / INGERSOLL

Machining stroke max. 620 x 420 x 400 mm

Milling machine
HERMLE / BRIDGEPORT

Machining stroke max. 1000 x 500 x 500 mm

Wire EDM machine SODICK / MITSUBISHI

Machining stroke max. 530 x 370 x 265 mm

Grinding machine ELB-SCHLIFF / ZIERSCH

Machining stroke max. 800 x 400 x 475 mm

Measuring machine ZEISS

Machining stroke 450 x 450 x 400 mm

Several state-of-the-art lathe, milling and grinding machines

Stamping tools

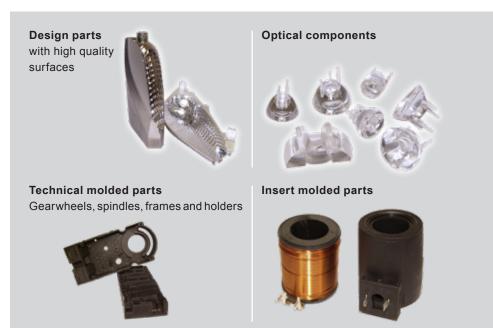

Progressive stamping tools for lead frames

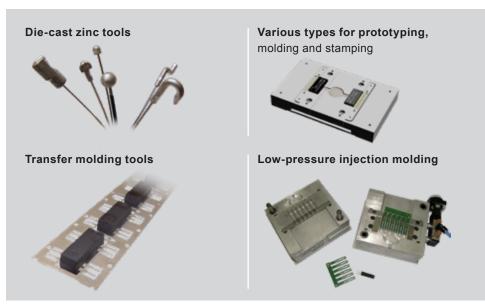

Stamped parts

for housing shields and contact pins

Injection mold tools

Specific tools

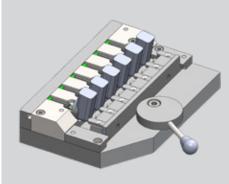

Machine and assembly services

Stainless steel tube machining cutting, laser welding, marking

Manufacturing of electrodes in copper or graphite

Fixture design and production

Tooling repair and maintenance

Development, design and construction

CNC design, simulation, verification and integration
